

Soft - Skills

By Yash Thakar

Tell me about your self

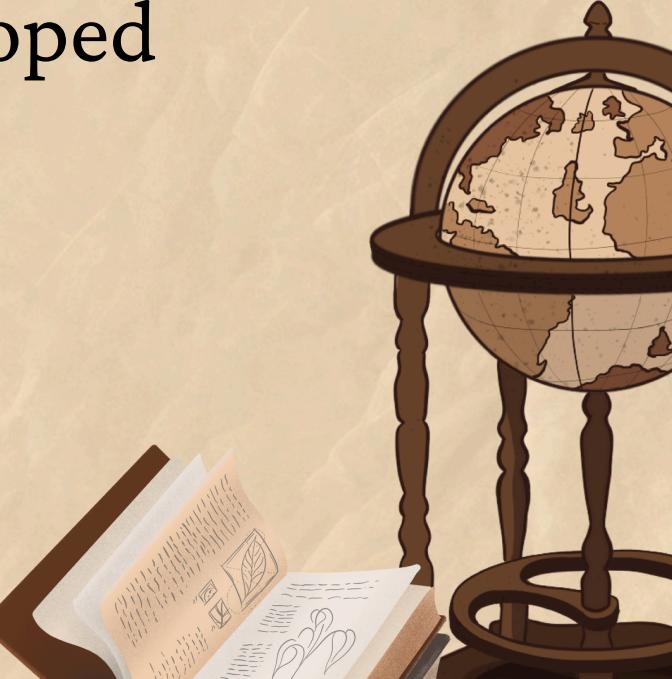

Hello, My name is Yash Thakar or I am an software engineer in profession. Recently I have completed my graduation with BCA from C.U.Shah college, Saurashtra University. I am an Full Stack Devloper. Also right now I am Pursuing MERN stack course in TOP's technology Ahmedabad. I am from Surendranagar but right now I am living in Ahmdabad . We are four members in family. I like to listen music and play cricket. That's about me, Thank you.

Why are you into IT field?

I initially chose commerce for my 11th and 12th grades. However, during the COVID-19 lockdown, I observed that IT professionals were able to continue working remotely while many others couldn't. This inspired me to switch to the IT field and pursue engineering after 12th grade. My cousin, is also an architectural designer, He suggested me and I take up BCA (Bachelor of Computer Applications) after 12th. I completed my BCA in 2024 and developed a strong interest in JavaScript during my studies.

Where do you see yourself after 5 years

After five years, I see myself as a skilled software developer, especially in JavaScript. My goal is to make important contributions to my company and the tech community.

What inspires you

It is the cup of tea which inspired me when I am frustrated, feel low or am bored. Also I watch movies which indirectly inspires me.

What are your strengths and weaknesses

Strengths

- Self Inspiring
- Organised
- Cricket - gaming
- Team Work
- Honest
- Multi Task

Weaknesses

- Overkind
- Lack of Confidence
- Trusting Others Easily

Talk about your fav movie, place and short term goals

Movie

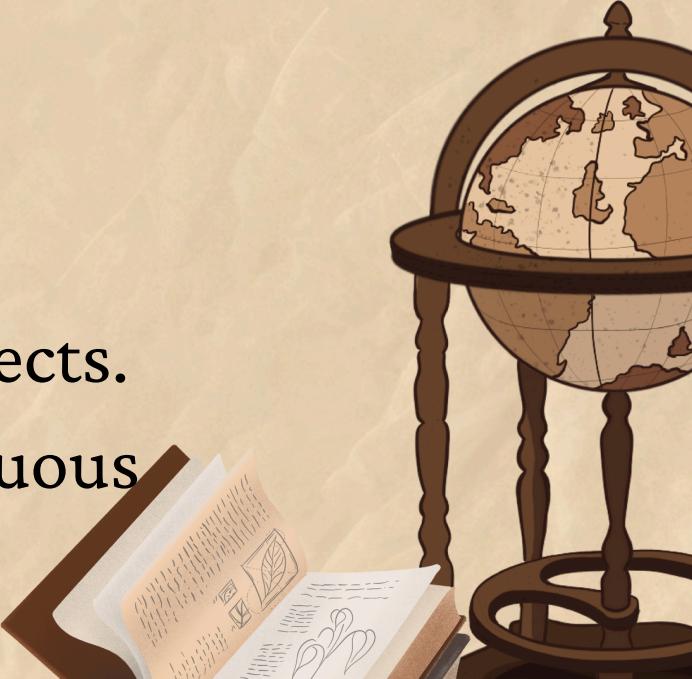

- 3 idiots is my favourite movie because it has blend of humor, heart, and commentary on the education system makes it both entertaining and thought-provoking.

Place

- Somnath is my favorite place because of its serene atmosphere and the profound historical and spiritual significance of its temple.

Short term goals

- Master the fundamentals of React and Node and build a portfolio with full-stack projects. Focus on learning version control, API development, deployment, testing, and continuous learning to stay updated

Thank You
